PORTLAND ON WALLAMET

[From the Overland Monthly]

[Concluded

The apple is fast becoming exclusively an Oregon product. The day is not far distant when the choice fruit of this country will rank first in all the apple markets of the world. The handling and exporting of this crop is already an important feature of the commerce of Portland. The first export of fruit from Portland was made by Meek & Luelling in 1853. They shipped two hundred pounds, for which they realized five hundred dollars. This was the first grafted or cultivated fruit ever offered for sale in the San Francisco market.

1854 the same parties sold forty bushels of Oregon apples in San Francisco for $2,000. The export to San Francisco continued to increase.

During the next seven years, from the best information that can be obtained, the export and sale was as follows:

1855	1,6[illegible] boxes	at 60c to $1 per lb
1856	5 000	2c to 5c
1857	15 000	[illegible] to 50c
1858	21 190	7c to 35c
1859	72 000	3c to 26c
1860	86 000	3c to 10c
1861	75 394	at an average of 5c per lb

A box of apples in Oregon parlance is equal in bulk to a bushel, but of course the weight varies with the quality of the fruit.

Portland is well supplied with good water and gas. The latter was first introduced in 1857 by a company working under a charter from the Assembly, exclusive for the period of fifteen years. The company have laid three and one half miles of mains from three to six inches in diameter, and their works are of sufficient capacity to supply a city of 30,000 population. For this brilliant substitute for the tallow dips, links and rush lights of our ancestors, we pay six dollars per 1,000 feet.

The water works were commenced in 1856 under a city ordinance giving the simple right to lay pipes in the street. No change has been made in the matter. The company have two reservoirs on the verge of the city. One, two miles from the dam, supplied by a six inch main, is one hundred feet square by fifteen feet deep. Another three fourths of a mile from the dam, supplied by a seven and one-fourth inch main, is two hundred and twelve by two hundred feet square and fifteen feet deep. There are about eight miles of mains laid in the streets from three to seven and one fourth inches in diameter. A large sized reserve reservoir is about to be constructed. For an ordinary family, with bath room, water costs two dollars and fifty cents per month. Cisterns are quite common, or rather, were so. The best of water can be obtained in that way, but the superior convenience of the hydrant is bringing it into general use. I suppose the time will come (I know it ought to be nigh at hand) when the public, through the agency of its governments, will enjoy its water, gas and telegraphs at first cost and without the intervention of middle men. To convert a municipal government into a practical Co-operative Union, for the purpose of supplying the community with either or all of these necessaries is a very simple thing, *provided* one could be found or constituted with the requisite sense and integrity. In the meantime, the public must expect to pay for these things as it does for others—whatever price the seller can get for them.

The population of Portland is principally engaged in mercantile and mechanical pursuits—the latter being for the most part those required in house building and finishing. The Irish furnish a large share of the unskilled day labor and a few of the tradesmen and mechanics. Washing and wood sawing have been monopolized by the Chinese, except what of the latter is done by machinery. They are also employed extensively as house servants. The negro population is comparatively small, but increasing by immigration and otherwise. So far it is moderately thrifty and well conducted. They have a public school and are about to erect a house of worship. The merchants and business men are principally Jews and Americans from New England and New York—particularly New England. Theatrical amusements never ranked high in Portland, and now they are at a very low ebb. There is no theatre house in town fit to be called such. Occasionally a low grade of minstrels and vulgar comedy exhibit in halls and melodeons employed for the occasion.

On the other hand church going is comparatively common. The church buildings will accommodate four thousand persons, and probably on an average one half that number attend the Sunday services in them, but the communicants are a still less number. The churches are eleven in number—two Episcopalian, two Roman Catholic, one Methodist, two Jewish, one Baptist, one Presbyterian (O. S.), one Congregational and one Unitarian. Within one or the other of these congregations will be found the larger portion of the substantial worthy people of Portland. The Methodist and Roman Catholics have the greatest number, drawn comparatively from the humbler walks of life. One of the Jewish congregations is of reformed practice. Both of them represent comparative wealth and are growing in numbers. These children of Shem—at least the German part of them—are a domestic home-loving people. As a rule they marry young and faithfully obey the first commandment given to man and woman—"Be fruitful and multiply." How long will the cultivated American of Yankee descent, with his maximum family of one delicate child, successfully compete with this healthy and fruitful people for the lead and mastery in commerce and business?

The town of Portland constitutes one school district, and is placed under the management of three directors chosen by the voters of the district. The schooling population of children between the ages of four and twenty is not far from 2,000. There are three public school houses, which in the aggregate accommodate 1,000 scholars. These schools are well kept and the buildings are very fair. With the grounds and furniture they are estimated to be worth $72,500. In addition to these there are five private schools, all of which are well patronized. They are more or less exclusively under denominational patronage and influence, as follows: two Roman Catholic, one Methodist, one Jewish and one Episcopalian. The average number of scholars in attendance upon these private schools is about four hundred.

The fire department consists of five companies, two of which work steam engines. The organization is based upon the so called voluntary principle, but the city bears a large part of the expense. In early days the active and leading young business men belonged to the department and controlled it. But as time passed and these [illegible] young fellows got married, waxed old and wealthy, they let go of the brakes, and the leadership is passing into other and different hands. Now the engine house is becoming more and more a club room. As in larger cities, the day will come here when the control of the fire companies will be sought and obtained by rough captains, to enable them to get place and plunder through politics and to [illegible] politicians at primaries and polls. So far the department has been very efficient and has as little in the hands of political cappers as one could expect such an association of men to be in this voting country. Yet it is a noticeable fact that a certain class of party athletes appear to appreciate an engine company quite as much for the vote it can throw as the water.

The newspaper business is well represented in Portland. All the Eastern dispatches published at San Francisco in the morning *Alta* and *Bulletin* are published at Portland the following morning in the DAILY OREGONIAN and *Herald*. The OREGONIAN is the oldest paper in the State, now in its [illegible]. The weekly was commenced in 1850 and the daily in 1861. It has been published the past ten years by Henry L. Pittock. In typographical appearance and general appointment it is not excelled, if equalled, by any paper on the Pacific coast. The annual cost of publication is from $40,000 to $50,000.

The present surveyed limits of the city include King and Couch's addition on the north and Caruthers' addition on the south—about three square miles. The houses on Front street are of a substantial character. Many of them are built of brick, and three stories high, with stone or iron fronts. The best of brick are made in the vicinity—in fact anywhere in the Wallamet valley. A quarry lately opened up the river furnishes a stone of a light grey color, with a bluish tinge, that cuts into any shape and hardens with exposure to the air. First street is devoted to retail business. Both it and Front are laid with the Nicolson pavement. The latter was laid in 1860. Owing to the fact that the ground was soft in some places and sank away, several yards of the pavement were taken up this Spring and relaid. Not a block or a board gave any evidence of decay, and the wear was hardly perceptible. The streets are laid out at right angles. The ones running parallel with the river are numbered First, Second, and so on to eleventh. This does not include the street immediately upon the river, which is called Front, nor Park street, which is intended to be the [illegible] of the city. It is between seventh and eighth and is in the centre of the city from east to west. The streets running at right angles with the river are named principally after the forest trees and some few individuals and places. One is very properly named after the great Oregon fish, the Salmon. [illegible] the Indian fisherman landed his light birch bark canoe at the foot of this street and swapped his furs [illegible] the Columbia and Wallamet for [illegible] hence the name. *Alleys*—the places where dwell the marked social extremes of city population—are not yet invented.

On the city front the Wallamet is about a fourth of a mile wide. From the foot of Stark street it is crossed by a tolerable steam ferry every ten or fifteen minutes. At this point the tide ebbs and flows from eighteen inches to two feet. Any vessel that can come into the Columbia can lie at the docks. The wharves are extensive and of a very superior character, one of them—the Oregon Steam Navigation Company's—being the finest on the Pacific coast. Front street is about twenty five feet above low water mark, and once within the memory of white men the northern portion of it was a few inches *below* high water. At about a half mile from the river the elevation above Front street is from a few feet to a hundred, the greatest elevation being at the south. This elevation is maintained without much variation for another half mile eastward, when the plateau terminates in a semi circular range of fir clad hills, which overlook all the surrounding country.

The special drive of the Portlanders is out to the White House and Riverside Race Course, six miles south of town. The road—an excellent McAdam one—winds along the west bank of the Wallamet. The drive is a very romantic and interesting one. On the one hand is the clear blue river, apparently of an unfathomable depth, and on the other the river range of hills, rising quite abruptly in places from the line of the road to the distance of several hundred feet, and covered with great old evergreen forest trees.

From the greater portion of Portland the snow covered summit of Mt Hood—distant about forty miles to the east—is plainly visible. Buttman's picture gives a fair idea of the view. But the full effect cannot be produced on canvas. You must be comfortably seated on the well shaded east porch of a Portland residence on seventh street, when the thermometer is at ninety, and gaze for long upon that great white glistening snow peak, rising out of and towering far above the surrounding dense dark green forests, to appreciate the sublimity and originality of this Monarch of the Mountains.

The principal public building in Portland is the Court House, erected in 1865-6, at a cost of $100,000. Its form is that of a Roman Cross. The basement is built of stone and contains the county jail. The walls above the basement are of brick and the roof is of tin. Its greatest length is one hundred and eighty feet and its width eighty four feet. The height from the floor of the basement to the eaves is sixty feet, and to the top of the dome one hundred and fifteen feet. The dome is a light, wooden structure, rising from the centre of the building and immediately over the main court room. It is circular in form, about twenty three feet in diameter, and towers in the air fifty five feet above the level of the roof. From the promenade surrounding its base you have a commanding view of Portland and the adjacent country. Away across the Wallamet your eye takes in the houses and orchards which constitute the suburban town of East Portland. A little to the east and south is the Insane Asylum for the State. Still some miles beyond you see the green isolated hill, called—from some actual or fancied resemblance to the place of the Saviour's transfiguration—Mount Tabor.

Between 1851 and 1866 the material growth of Portland was stimulated beyond the ordinary pace by the new mining trade and travel with the countries to the eastward of the Cascade mountains. This having since subsided, as all mining trade and travel does, there is a visible decline in the superficial and profitless buzz and bustle that always accompanies the shoal of sprightly and unthrifty adventurers who float hither and thither upon the flood tide of mining excitements. But the real prosperity and importance of Portland have never rested upon such uncertain foundations as these. Portland is the mart of the Wallamet valley, and such it ever has been and will be. This resource can never fail her, and to appreciate the future of Portland you must have some knowledge of the wonderful capacity and productiveness of this garden of the Pacific.

The Wallamet valley lies between the Cascade and coast ranges of mountains. It is about one hundred and twenty miles in length from north to south, and on an average about fifty miles wide. It is a *third larger than the State of Connecticut*, containing in round number, exclusive of the slopes of the mountains, four millions of acres of land, and such land as is seldom found in the same quantity elsewhere on the earth's surface. Taking the vote of June 1866 as a basis, and allowing five souls to the voter, the valley then contained a population of 66,525, which to-day has increased to 80,000 at least. The average of the old agricultural States is about thirty souls to the square mile, but this estimate includes much barren and unproductive land. Besides, the Wallamet valley is already a manufacturing district, and its capacity in that respect is very great. It abounds in wool, wood, iron, and water power. In 1860 the population in Connecticut equalled ninety eight to the square mile. When this Oregon valley reaches that point, and it is capable of going beyond it, it will contain 615,384 souls, more than the whole State of California to-day.

About one-third of the valley is prairie land, the rest [illegible] more or less heavily wooded with fir, oak, maple and ash trees. Timber and water are well distributed and of a superior quality. The climate is temperate—the mean temperature being about sixty degrees. The mean rain fall for the year varies somewhat in localities, but fifty inches is not far from the average. The greater portion of this usually falls in the months of November, December, March and April. Rain seldom or never falls in harvest time—from the first of August to the middle of September. The soil and climate are especially adapted to the production of small grain, particularly wheat. The apple, pear, plum, cherry, currant, strawberry, blackberry and raspberry of the best quality grow in great abundance. There is no better country for the domestic animals, and the Wallamet wool is already famous and will always rank high in the wool markets of the world.

The valley is drained by the Wallamet river. This river is now navigable from Portland for half the length of the valley the year round, and for the whole length during some months in the winter. In the progress of time the navigation will be improved materially, as it has been in the last fifteen years. Eleven comparatively important streams flow into the Wallamet during its course through the valley. Some of these are now partially navigated by steamboats, and may be much more so. Besides, they furnish supplies of water power for all kinds of mills and machinery. The head of the valley is only about four hundred feet above the level of Portland, and railways can be constructed on each side of the river at a comparatively small cost.

This is an imperfect estimate of the country which lies at the back of Portland. It will be seen at a glance that the trade and commerce of such a valley must in time build up and sustain quite a city. Yet [illegible] the highway of the [illegible] more than Boston or Philadelphia. It will never be the centre of fashion or speculation or [illegible] comparatively [illegible] peculiar [illegible] manners, opinions and business, but it will be worth more dollars per head than either London or New York, and its good citizens will sleep sounder and live longer than the San Franciscans. In population [illegible] exceed 50,000 [illegible] strangers will often be drawn away to the Metropolis of the Pacific, where they are sure to win the prizes in commerce [illegible]. Yet for all that, and more [illegible] casting about for a place where a fair stock of sense [illegible] and good habits will, within certain limits, pay certainly and well in any honest calling, let him or her take passage at once for PORTLAND ON WALLAMET.

Gen Grant's Statesmanship

[From the New York Tribune.]

Some of our cotemporaries are in a painful state of patriotic apprehension and alarm lest Gen. Grant's abilities as a statesman should not prove equal to the duties of the Presidential office. Other Presidents, say they, have in their messages to Congress taken the initiative in legislation by proposing and recommending measures, but Gen. Grant begins by declaring that he has no policy. This is a mistake. Gen. Grant has not declared that he will have no policy, or that he will not perform his constitutional duty of recommending to Congress such measures as he shall deem proper for their consideration. He has declared, on the contrary, that he has a policy, and that his policy is not to enforce any policy against the will of the people. We cordially indorse this declaration as evincing, in the most vital point, sound views of the functions of a President under our Constitution. We further commend it as truer statesmanship than many of our Presidents have displayed. In stating that he has no policy "to enforce against the will of the people," Gen. Grant implies that his whole energies will be devoted to enforcing such policies as the people through their representatives in Congress shall have embodied into law. The maintenance of peace and order, the protection of the rights of all classes to invest and labor and to reap the fruits of their capital and industry, are boons which through more than half the area of our country have never been enjoyed. General Grant, in securing these to the South, will add hundreds of millions of dollars per annum to the wealth and prosperity of that section. The maintenance of peace upon our Indian frontier, and the substitution of the reign of law for violence and brute force in our mining and border districts, would immensely aid the development of the mineral Territories into States, and the outward flow of wealth which the Government and people would derive from the precious metals toward the redemption of the national debt. The vigorous enforcement of our revenue laws would at once greatly cheapen the objects of revenue to the consumer, increase the income of the Government, lessen the burdens of honest taxpayers, and turn out of office the tax-thieves who now stand between all imported and manufactured articles and their consumers, and gorge themselves by plundering alike producers, consumers and the Government. In achieving these great results, Gen. Grant will win a success far more difficult and glorious than could arise from any influence he might exert over the legislative and political policies of Congress. Nay, his success in these, his proper fields of duty, will add a power and force to such recommendations as he may feel called upon to make to Congress, which they could not otherwise obtain. Andrew Johnson lost the power to command for [illegible] of the discretion and modesty to obey. Gen. Grant, by entering upon his office, with no other disposition than to obey, and by the steady pursuit of that wise policy, will attain a far greater influence and real power to command. So far from such a policy affording any indication that Gen. Grant will be a negative or weak President, it is only the application to civil affairs of the same quiet wisdom which has lifted him into the supreme military power and insured his success in every undertaking on which he has entered.

Seymour and Blair

The ardent friends of Pendleton are very sick The nomination of Seymour over their favorite nap [illegible] them but to have Blair forced into their political stomachs has set them to kicking and heaving in the most vigorous manner On the general principles of Copperheadism, Seymour, it is true suits them [illegible] well, but on the great greenback issue he is not their man They remember that only last spring he made a speech against the Pendleton theory and took strong ground in favor of giving gold to the bond [illegible] When his nomination was reported [illegible] the enthusiastic Pendletonians were suddenly taken aback There were many maledictions upon the Convention for selling out to the bondholders In this city not the [illegible] ation of satisfaction was [illegible] over the announcement of the action of the Convention Twenty-four hours after [illegible] our's nomination was made known here and before the elongated visages of disappointed Democrats had had time to resume their natural shape, the blare of Blair's trum[illegible] It gave forth a feeble sound to be sure, but it carried cruel tidings to the "Democracy" The nomination of Seymour in the [illegible] of a "bloated aristocracy of bondholders" was hard enough to bear and as a [illegible] to assuage the injury and [illegible] the [illegible], it was naturally expected that the ticket would bear the name of a "[illegible]" for the second office But the last [illegible] of [illegible] is worse than the first [illegible], an early Abolitionist and an old [illegible] of [illegible] party, who aided in [illegible] that [illegible] and in securing the [illegible] of Republicanism,—Frank [illegible] who but just now was one of "Lincoln's [illegible]" and a [illegible] dropped minion of [illegible]" who took part in the late [illegible] against the rights of our [illegible] brethren,—[illegible] Blair is nominated for Vice President! He is the last man of [illegible] millions who will vote with that party in November whom the Democracy of [illegible] have chosen for the candidacy [illegible] will [illegible] no real enthus[illegible] and none in any State west of [illegible] Blair will be a dead weight upon [illegible] Seymour's name will com[illegible] votes, but it will repel [illegible] to their country during the [illegible] is that of a viciously disloyal [illegible] who [illegible] nominated [illegible] that [illegible] fact has not [illegible] for[illegible] and confidently predict [illegible] will carry every State [illegible] the Rocky Mountains [illegible] give up the contest [illegible] in the [illegible] [illegible] Grant and Colfax [illegible] with [illegible] with the Army [illegible] with ballots and [illegible] it a powerful support, with [illegible] in every section of the [illegible] to the efficiency of [illegible] with all the active combina[illegible] in the interest of loy[illegible] for its success,—with [illegible] into the battle the [illegible] [illegible] now [illegible] of all we have [illegible] through the many [illegible] of our [illegible] conflict!

If the Secretary deem proper he may let any portion of the work on contract to the lowest bidder The canal is to be free for American vessels, and subject to tolls as to foreign vessels, until such rate of tariff as may be found [illegible] for maintaining the work and paying interest on its cost shall be adopted The cost of this [illegible] work is estimated by Govern[illegible] at about $12 000 000

POLITICAL ITEMS

The New York *Commercial* tells the whole story in six lines Until Ulysses S Grant took command of our armies rebellion was confident of success Until Ulysses S Grant took command of the Republican party, the Democratic party was equally confident of success. And as he finished the first, so will he finish the second

The brief loyal spasm of Democracy which was manifested in the proposal of one wing of the party to nominate Chase is over The virus of Copperheadism is so inwrought with the party's life that it prefers dissolution to conversion Had Chase won the party from its idols he would have been the most successful missionary since Paul evangelized the world

The Jackson (Mississippi) *Clarion* (a Conservative newspaper, favoring the election of the Democratic State ticket,) has an account in its issue of the 15th of "A great day at Terry" the principle feature being six freedmen speaking against Radicalism and for Democracy The *Clarion* calls attention to the glowing report of the great day at Terry

The Chairman of the Democratic State Central Committee of Pennsylvania informed a friend in Pittsburgh a few evenings ago that it would be a hard job to carry Pennsylvania against Grant and Colfax and to prove it he demonstrated that last fall the Democratic Judge was elected by less than one thousand, with the Democrats polling 84 per cent of their whole vote and the Republicans 75 per cent or less of theirs

The editor of the Carson *Appeal*, who fought as a Captain through the war, was recently accused of having first offered his services to the rebels He denies this and gives the following bit of personal history "We went into the army (commissioned by President Lincoln) a 'War Democrat' we got some education in political ideas as the war progressed the scales fell off our eyes and we got our discharge at length after seeing some of the biggest battles that were ever fought, happily rid by some wholesome blood letting, of whatever 'Democratic taint there was in our veins an out and out Abolitionist" Frank and manly enough

Judge Benjamin F Porter of Alabama, in a recent letter, approving the Chicago nominations says "The clamors of negro supremacy, which assail the Presidential ticket receive no countenance from me No man in his senses, in the South or elsewhere need fear that, in this intelligent country and in this Christian age, intellectual and moral power will not reach the apex of the temple of liberty and hold it It is the storm of revolution that brings ignorance and corruption to the surface of society In times of peace and submission to the law, they sink to obscurity and control no nation's destiny. Civil equality is not personal or social degradation"

The Washington correspondent of the *Worcester Spy* says he speaks what he knows when he says that ever since the passage of the reconstruction acts, Mr Chase has directly employed all possible agencies to get the Republican party (until recent events), and more especially the new vote of the South, committed to him One of the *sub rosa* difficulties against which the Congressional Republican Committee has had to contend with in the management of the Southern campaigns, has been the untiring energy of Mr Chase's friends to use its machinery for the advancement of their favorite. The Committee's aim was to reconstruct the South, not canvass for any special Presidential candidate.

Mr Edward Rhett, editor of the Charleston *Mercury* lately wrote a letter from New York to his paper, in which he laid down the following platform, which he wants shall be recognized by the New York Convention If it is not, the South will feel no interest in its proceedings, and the Democratic party "may go to the devil together for all we care The party must proclaim its purpose to wipe out reconstruction by Federal action —to undo all that has been done, pull down the State organizations, disfranchise the blacks, and restore the supremacy of that class that ruled before the war" He expresses the opinion that the Convention will "march up to the standard" And it has marched up to it. The platform is as re-actionary as any rebel could desire

LONDON, July 8 —Dispatches from Madrid indicate the revival of serious political trouble in Spain. Gen. Du Lee, Captain General of Cuba, General Serano, Duke de Talore, and five other Generals have been placed under arrest Warrants have been sent for the arrest of three [illegible] Generals, officers of high rank It was supposed that a dangerous and wide spread conspiracy had been discovered, and that the arrests were the result. To day's advices represent that a movement had been personated among some of the leading officers of the army which had for its object the placing of Don Antonez Duke De Montpensier, at the head of the Government The Duke, who is a brother in law to the Queen, has been requested to leave the country Additional arrests continue to be made in Spain of parties implicated in intrigues, which are believed to be effectually baffled by the prompt action of the Government.

The *Daily News* had a long editorial on the despatch relative to the Fenians recently sent by Mr Seward to Mr Moran, First Secretary of the American Legation The *News* says the despatch is discourteous and unfriendly to the English nation We have no hesitancy in denying that it expresses the views of enlightened Americans whom we know will repudiate the irritating notes of Secretary Seward. The United States will be glad to know, no doubt, that the English people and the English Government will treat such dispatches as a trick to affect elections

DUBLIN, July 8 —John Bright has arrived on a visit to Geo. Peabody On reaching Limerick he was received in an enthusiastic manner by the people.

Samuel Lever died to-day at an advanced age

Before the Copperhead National Convention was held the New York *Day Book* revealed a [illegible] in the highest degree exciting to the delegates It "learned that the entire National Bank cabal, a body of men numbering perhaps 5,000, representing 1,600 paper money institutions, and embracing about all the bondholders of the United States, big and little, intended to raise the sum of $1 000 from each bank," for controlling the Democratic nominations "The sum total thus raised will reach $1 600,000, and it is said, *will lay out Mr Pendleton cold*" And then follows this imploring appeal

"The delegates to the Democratic Convention of July must come here prepared to combat an amount of political corruption in their own ranks which has never been exceeded in the blackest period of the dominant party The infamous New York ring work under the secret countersign of "rule or ruin," and it will require all the virtue and all the patriotism which the Democratic party ever brought out in its palmiest days to prevent a political fraud from being concocted and foisted upon the Democratic voters for their suffrages We warn the western delegates that they must come here with the spirit of Spartans, and to yield to nothing that their best and honest convictions tell them is not the free, untrammeled, unpurchased expression of the Convention"

From the agonizing manner in which this appeal was sent up it is clear that the Pendleton organ was well aware of the irresistible itching of Democratic palms, and the result shows that its fears were well founded Seymour is the candidate of the bondholding wing of the party.

The "organ" calls Seymour "one of the purest men of the present age, an able statesman a ripe scholar, an earnest patriot, and a citizen without reproach" This is the old formula of words which Beriah has used a thousand times in regard to candidates He would have said the same thing had John Morrissey been nominated instead of Seymour.

The Democratic Convention—Great Confusion

NEW YORK July 8 —The seventeenth ballot resulted Hancock 137½ Henlon, 70½ Hendricks 70

Tilden of New York said a careful conference and consultation between the delegates was now important, and he therefore moved to adjourn Vallandigham seconded the motion which was voted down

The eighteenth ballot was then taken When Illinois was called Richardson chairman said the delegates instructed him to vote as a unit He therefore should give the entire vote for Hendricks One of the delegates protested and wanted his vote recorded for Pendleton Another wanted to vote for Andrew Johnson A great sensation ensued, but the chair proceeded to announce the vote Hancock, 144½, Pendleton 35½ Packer 3½ Johnson 1 Doolittle 12 Hendricks 87, Hoffman 3

Several delegates insisted on the point that each delegate had a right to vote individually, and offered a resolution to that effect The Chair ruled it out of order, because it was in contravention of the rules adopted

The rule in the Charleston Convention was read which recognizes the right of each delegate to cast his individual vote, except where the State Convention instructed delegates how to vote

Richardson said Illinois had instructed her delegation to vote as a unit also to vote for Pendleton The majority of the delegation had decided to go now for another candidate He deemed it his duty to cast the entire vote of the delegation Here was a scene of great confusion Adjournment was moved and carried

DESTRUCTIVE FIRE.—The extensive Sash and Door factory of Mr. John P. Walker was totally destroyed by fire [illegible] day. The fire was discovered about twenty minutes before eleven o'clock, A. M., by workmen in the second story. At that instant sparks and smoke were seen [illegible] out of the chute which communicated between the second story and the basement, and which was used for the purpose of conducting the shavings and chips of the work rooms to the basement near the boiler and engine. Upon seeing the sparks and smoke issue from the chute, one of the workmen ran to the front of the building and cried "fire" and then turned with the intention of covering the top of the chute with boards to smother the fire; but so quickly did the flames mount that when he returned, a fierce volume of fire was already rushing out of it and shooting up among the racks of moulding [illegible]. In an instant the whole interior and upper part of the room was in broad flames. The draft of air through the chute was so strong that the [illegible] volumes of fire roared to the roof and, carrying [illegible] the whole length of the building and again down the end to the floor. The workman who had first [illegible] the fire, seeing that there was no possibility of [illegible] the building ran to the desk to get the books, but it [illegible] locked and he failed to open it. Just at this [illegible] Mr. Walker came running up with a bucket of [illegible], but seeing the hopelessness of doing anything [illegible] the progress of the flames, he dropped the bucket and went for his books. He succeeded in getting them and then he and the others, already almost enveloped in fire, retreated precipitately, but none too quickly, as Mr. Walker had his hair and beard considerably [illegible]. The last man to leave the room says that he went out like taking a leap in the dark, not being able to see the door or anything else. The escape was a very [illegible] one for several of the men. And yet their exit from the room could not have been more than a minute and a half from the time of the [illegible] of the fire. By the time the bells sounded a [illegible] alarm the whole interior of the building was on fire and flames were [illegible] from the roof. The sides and roof were burned through everywhere when the engines arrived at the ground. The nearest cisterns which contain water being at some distance, a little delay occurred in [illegible] the hose and getting water started; but in a very short time, considering the circumstances, the [illegible] two hand and two of [illegible] were at work. By this time, however, the great piles of dry lumber surrounding the building were also burning furiously and [illegible] buildings near [illegible] the street were [illegible] with the [illegible] heat. The latter, however, with the exception of a small dwelling house between the [illegible] and the [illegible]. The firemen worked with almost superhuman energy and were assisted by great numbers of others; but all their efforts availed but little beyond saving the neighboring [illegible]. A part of the lumber was saved, but in a greatly damaged condition. Within half an hour of the breaking out of the fire, the factory with all its valuable machinery and finished and unfinished work, was but a pile of blazing ruins, piled down into the basement. The machinery was nearly all of it broken up or warped [illegible] frame with a creeping or rip saw was the only thing got out of the building. An [illegible] was made to get a valuable lathe out from the [illegible] floor, but the fire drove the men away before it could be moved an inch. The boiler remained unharmed, [illegible] is perhaps the only article which can be used [illegible] of the [illegible] machinery was melted. Mr. Walker had on hand in the building a very large amount of work [illegible] ready to turn out in a day or two. None of it was saved. His loss will amount to [illegible] and $40,000, of which $20,000 was in [illegible] and tools; about $7,000 in finished or partly finished work; building $6,000; lumber, say $5,000. [illegible] was no insurance on any part of the property. The [illegible] will be felt in some [illegible] as a loss, for, quite a number of workmen are thrown out of employment, and many of the buildings in course of erection in the city will be delayed till the destroyed [illegible] be [illegible] by some other shop and mostly by [illegible] of hand labor. Mr. Walker is a hard working man and has, almost literally, earned this property by the sweat of his brow. He has the sympathies of the community and will doubtless have all the aid he may need in rebuilding.

GUNS HEARD.—A few feeble guns were fired last evening at East Portland in response to the Democratic nominations. The firing was a mere matter of form, and from the way it was executed really seemed to be done as a very disagreeable duty. The guns didn't belch half so vigorously as Democratic stomachs have been heaving since Seymour the bondholder, and Frank Blair the Abolitionist and Federal satrap were nominated.

U. S. DISTRICT COURT—DEADY, JUDGE.—This court met yesterday morning and adjourned till ten o'clock A. M. to-day, when the decision in the case of the United States vs. steamboat *Rainier*, will be rendered.

LAID UP FOR REPAIRS.—The steamer *Ranger* has been laid up at the foot of Washington street for the purpose of receiving some necessary repairs. She has seen much hard service.

ALDER STREET.—The improvement of Alder street, between Front and First, has at last been provided for by the Council, and the work will probably be now soon finished.

THE PUBLIC SCHOOLS.—The public schools of this city closed their summer term yesterday and will have a vacation of seven weeks.

CAR SHOP RAISED.—On Thursday the East side Railroad Co. raised the frame of their shop—a building of 37 by 140 feet.

OREGON PRODUCTS.—The following were the receipts yesterday: 3,900 qr sks flour, 275 bags oats, and 554 bags wheat.

ARRIVED.—The steamer *Pacific* arrived at San Francisco yesterday.

THE FOURTH OF JULY HAT, suitable for warm weather, will be introduced to-day, Saturday, June 20th, at J. C. Mensdorffer & Bros. This Hat is manufactured entirely by our firm in this city. It is light, tidy and airy, and price very reasonable. Call and examine.

OFFICE—Southwest corner Front and Yamhill Streets, opposite E. J. Northrup & Co.'s Hardware Store.

I am now making, amongst numerous other styles of ARTIFICIAL TEETH, the improved Vulcanite Plates of Dr. G. W. Cool's Patent, patented Dec. 3, 1867, the improvement of which consists in lining the entire concave surface with fine gold; it not only makes the plate double as strong and cleanlier than the common Vulcanite Plate. It also can by it be made considerably thinner and lighter, whereas the price is but little above that for common plates. Call and see specimens.

N. B.—Dentists wishing to secure the office right for Dr. G. W. Cool's Improved Vulcanite Plates can have it made out to them by applying to this office.

N. B.—To strangers I would say, that a constantly increasing Dental Practice for the last five years in this city, will be a sufficient guarantee for them to receive a First-Class and Finished Piece of Work. Numerous testimonials to the same can be given at the office.

HAS CONSTANTLY ON HAND GROUND AND ROASTED COFFEE, GREEN COFFEE of the best qualities. CREAM OF TARTAR and SPICES of all sorts.

The undersigned, who has always enjoyed public confidence for the excellent quality of his Coffee, neglects nothing to justify the good name acquired by his productions, the sale of which daily increases. The acknowledged superiority of his merchandise, which commands here, and in the markets of the interior, a relatively higher price, excites the cupidity of some manufacturers, and every day he sees [illegible] the number of those who, by counterfeit or imitation of his mark, seek to deceive the public, palming upon them their inferior productions for the genuine G. VENARD CHARTRES COFFEE. This fraud can deceive nobody after a trial, but only adds to the favorable opinion of the consumers, the very flattering though unwilling testimony of the counterfeiters. Nevertheless, buyers should be forewarned, and placed on their guard against this practice.

BEWARE OF COUNTERFEITS.

Each package bears the signature of G. VENARD.

WEEKLY REVIEW

PORTLAND July 10 1868

New York quotation of Gold July 8th 140¾

San Francisco quotations of Legal Tenders July 8th, 71 buying and 71¾ selling

The Honolulu *Advertiser*, of June 11th, says that arrangements have been made by Consul Van Reed to import into Honolulu 200 Japanese laborers, who were to leave as soon as a vessel could be procured They have contracted to serve five years at *four dollars* per month. They are to be employed on the sugar plantations, and the material saving in cost of labor to result, is expected to work a not inconsiderable reduction in the prices of island sugars and syrups If the example be generally followed we may look for a partial revolution in the [illegible] of the sugar trade

The following quotations are from the S F *Alta* of the 21 inst — the latest newspaper date

Oats—Choice Oregon have been resold at $2 30@2 35 We quote $2 25@2 [illegible] as extremes for round lots.

Middlings—Fine sells at $40@45, and feed at $3[illegible] 50@37 50 per ton,

Bran—Quotable at $30 ℔ ton from the mills. Scarce

Beans—Sales of 400 sacks Bayos on terms withheld The market is firm at the following jobbing rates Bayos, 5c, [illegible] whites, 3@3¼c, pea, 12½c; pinks, 5c; reds, 3c, butter, 6¼c.

Potatoes—Owing to the demand for shipment the market has been active at an advance—$1 20@1 37½ for Bay and Mission

Onions—Quotable at 2@2½c ℔ lb for white, and 1½@2c for red.

Tallow—Sales since last Wednesday, as reported amount to 16 000 lbs beef at 7½c

Hides—Since our last weekly report transactions aggregate 1,400 California dry at 14@15½c.

Wool—The [illegible] is slightly firmer since our last similar report [illegible] which amount to about 380,000 lbs, have been made at 15@18½c.

Bacon—[illegible] at 15@16c, and Oregon at 11@12½c ℔ lb

Hams—[illegible] at 16@17c ℔ lb, and Oregon at 15@16c

Beef [illegible] at 12½@15c, [illegible] at 7@10c; mess at 13@15c ℔ lb.

Lard—Cal [illegible] at 14@15c, and Eastern at 12½@13c ℔ lb.

The bark [illegible] arrived at San Francisco, from Portland, on the 5th inst. The bark *Occident* cleared for Portland to take a [illegible] cargo of merchandise

The schooner *Alaska* is loading here with produce for Honolulu. The bark *Whistler* is loading with produce for Australia.

The shipments during the past week were, by the *Pacific*: 441 bales wool, 654 bags wheat, 393 sacks oats 2,019 qr sacks flour, 120 hf bbls dried apples 59 kegs and 2 cases lard, 49 cases and 39 gunnies bacon, 8 rolls leather, 24 [illegible] salmon, 2 kegs pickled salmon, 69 kegs, 167 boxes and 28 firkins butter, 11 bales and 5 pkgs merchandise, 9 bales furs, 114 boxes eggs, 991 dry and 25 [illegible] hides

Our local produce market continues generally dull, though there is a fair demand for best brands flour at the [illegible] quotations, the stocks at hand being very limited. Prices [illegible] are without change.

In the merchandise market there is little of interest to note. Dry goods are quiet. Groceries in fair request Hardware very dull.

Our merchants are suffering to some extent by recent failures in the interior, and other failures being anticipated, or at least feared, [illegible] are [illegible] to sell only to parties of well known [illegible] to pay, and on the short est [illegible] conspire to render [illegible] a dull time [illegible] even in this, the dullest [illegible] of the year.

WHEEL

THESE WHEELS, UNEQUALLED AND UNRIVALLED in the United States or the world have been fully tested on this coast, many being in use at this date, driving all kinds of machinery, Saw Mills, Flour Mills, Quartz Mills, Woolen Factories, &c , &c

CAUTION.

To all whom it may concern I hereby give notice that the so-called "Shipley's Pacific Turbine Water Wheel" is a direct infringement and copy of the "James Leffel's American Double Turbine Water Wheel," and its manufacture and use is hereby prohibited Any person or persons making, using, constructing or vending said Water Wheels make themselves liable to heavy damages and penalties Parties interested will take notice, for I shall prosecute said infringements to the utmost extent of the law

That all may know I mean what I say and am not playing "*bluff*" I give the following extract from a legal opinion on this subject from one of the most eminent Patent Attorneys in the United States

WASHINGTON, D C , April 17 1868

" MR A MYERS—In accordance with your request we have examined the patents of Shipley in Water Wheels and are clearly of the opinion that they both infringe the Leffel's patents In both of Shipley's Wheels he uses the upper and lower tiers of buckets precisely as Leffel does, and in this he clearly infringes The fact that Shipley has applied another series of buckets in addition to those used by Leffel, does not relieve him from the consequences of infringement at all He has no right to use those two tiers of buckets, whether alone or with a third, or any other number of tiers added It is a clear infringement. Respectfully yours,

DODGE & MUNN

I hereby give notice that I will prosecute every infringement on our Patents, whether it is the maker user, buyer or seller Every infringement, whether our claims are used in whole or in part, will be prosecuted

THESE WHEELS EXCEL ANY OTHER WHEEL in use and are no infringement on the Leffel American Turbine, but excel it in every particular

CAUTION.

To all whom it may concern —One A Myers is publishing and circulating a statement that my wheel is an infringement on the Leffel wheel and he will prosecute said infringement to the utmost extent of the Law His statements are not worth a denial His game is Bluff which, if he would only take the case to Court would soon be played out Don't believe him

I would be glad to get a case into the United States Court and get a decision That would forever stop the mouth of Myers and his misrepresentations The legal opinion of more reputable lawyers than Dodge & Munn and A Myers have pronounced my patents no infringement on the American Turbine. NEW REMEDIES, NEW REMEDIES

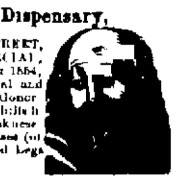
Dr Gibbon's Dispensary,



616 KEARNEY STREET, NEAR COMMERCIAL, San Francisco Established in 1854, for the treatment of Sexual and Seminal Diseases such as Gonorrhoea Gleet, Stricture Syphilis in all its forms Seminal Weakness Impotency, etc Skin Diseases (of years standing) and Ulcerated Legs successfully treated

Horrible Diseases.

How many thousands of persons, both male and female are there who are suffering out a miserable existence from the effects of secret indulgences or from virus absorbed into the system Look at their pallid, emaciated and disfigured faces and their broken-down constitutions disqualifying them for the happiness of marriage or the enjoyment of life In this horrid situation they live and suffer until death closes the scene Let parents, guardians friends attend to those who are suffering with any of these horrible life destroying maladies see that they are cared for and cured before it be too late Send them immediately to Doctor Gibbon a physician who has made private disease his especial study for years and who is certain to cure the most inveterate cases without mercury or any injurious drugs It is important to those who are afflicted, or to those who are interested in the welfare of their friends to be careful of the many pretended doctors who infest all cities, publishing their skill in curing all diseases in a few days imposing upon the public by using the names of eminent physicians from Europe and other places Be therefore careful and make strict inquiry or you may fall into the hands of those charlatans

Seminal Weakness.

Seminal Emissions the consequence of self abuse This solitary vice or depraved sexual indulgence is practised by the youth of both sexes to an almost unlimited extent, producing, with unerring certainty the following train of morbid symptoms unless combatted by scientific medical measures, viz Sallow countenance dark spots under the eyes pain in the head ringing in the ears, noise like the rustling of leaves and rattling of chariots uneasiness about the loins, weakness of the limbs, confused vision, blunted intellect, loss of confidence, diffidence in approaching strangers a dislike to form new acquaintances, a disposition to shun society, loss of memory hectic flushes, pimples and various eruptions about the face furred tongue, foetid breath coughs, consumption, night sweats monomania and frequent insanity If relief be not obtained should apply immediately either in person or by letter and have a cure effected by his new and scientific mode of treating this disease which never fails of effecting a quick and radical cure Dr G will give One Hundred Dollars to any person who will prove satisfactorily to him that he was cured of this complaint by either of the San Francisco quacks

MARRIED MEN.

Or those who contemplate marriage who are suffering under any of these fearful maladies, should not forget the sacred responsibility resting upon them nor delay to obtain immediate relief

DOCTOR GIBBON is responsible, and will give to each patient a written instrument, binding himself to effect a radical and permanent cure or make no charge

CURED AT HOME.

Caution to the Unfortunate.

Beware of the San Francisco quacks and pretenders, who with bogus sworn to certificates dupe the unwary Some of the self styled doctors, whose names are to be found in the daily and weekly newspapers of San Francisco and other places are tradesmen, and became too lazy to work at their trades Some are tinsmiths shoemakers newspaper carriers intelligence office keepers, etc Look over the San Francisco Directory, and you will not find their Medical Institutes in it but you will find their former occupations in it Look at the Directory for 1862 and 1868 The only way to avoid imposition is to make enquiry—it will cost you nothing and may save you many regrets, for as advertising physicians in eight cases out of ten, are bogus there is no safety in trusting any of them until you know who and what they are Dr Gibbon does not deceive people by exhibiting bogus titles certificates pretended patient's letters, etc Dr Gibbon will satisfy persons who may call at his office of his ability to treat diseases that he proposes to cure

INSTITUTE.

- *** *CONSULTATION, IN ALL CASES, FREE.*
- *** *CURES GUARANTEED, OR NO PAY REQUIRED.*
- *** *IN ALL CASES WHERE CONFIDENCE IS REQUIRED THE UTMOST SECRESY MAINTAINED.*

The above rules, established by Dr. J. C. Young in 1850, and which have done so much to secure the reputation of this Institute, are still adhered to, affording those in need of medical aid, the certainty of cure and the utmost confidence.

There is nothing of so great importance to the sick as to know where to find a physician whose skill and humanity give assurance of proper and delicate treatment. The Doctor would respectfully call the attention of those of both sexes who are suffering or in trouble to the invariable success that has marked the career of the Institute in the seventeen years of its existence.

It is unnecessary in this connection to enumerate all the complaints treated at the Institute, but the Doctor feels it his duty to call especial attention to that terrible scourge,

SEMINAL WEAKNESS,

That is sapping with its insidiousness the very life of its victims; in the treatment and cure of which the Institute has earned so enviable a reputation.

READ! READ

I am aware that by dwelling upon so [illegible] subject as the decay of manly vigor through the loss of the vital principle of life, the ignorant may [illegible] tive; but the desire to point out to those who [illegible] guish and decay, the true cause of their [illegible] great an incentive to be [illegible] into abeyance. Marriage is sought by a natural im[illegible] a hope of relief. Without Mercury or other Deleterious Drugs,

Shows conclusively the use of them to be not only uncalled for but actually dangerous, for it is a [illegible] established medical principle that those [illegible] by entering the blood, ruin the constitution and [illegible] life

The Doctor effects a cure in recent cases in a few days, and finds no difficulty in curing those of long [illegible] without submitting the patient to such treatment as will draw upon him the slightest suspicion or oblige him to neglect his business whether in-doors or without, [illegible] diet need not be changed. When a female is in trouble or afflicted with d[illegible] requires medical or surgical assistance, the inquiry [illegible] be Where is there a physician competent to [illegible] relief and whose respectable standing in society will recommend him to the confidence of the community?" The Doctor understanding how imperatively [illegible] by these requirements are feels called upon to interpose, and by calling the attention of the afflicted to the fact that he has been Professor of Obstetrics and Female Diseases for twenty years and is fully qualified to administer in all cases, both medically and surgically not in a superficial [illegible] but in as thorough a manner as years of study and [illegible] —both in hospitals and private families—can make, to save them from the hands of the unqualified unscrupulous or designing Therefore families can rely upon him to be as a father All in affliction can find in him one who [illegible] and sympathize with and befriend them in [illegible] in whose secrecy the utmost confidence can be [illegible] consultation by letter or otherwise, free.
